

Victoria Avenue Bridge Seismic Retrofit

Project Duration:

Completion scheduled for February 2006

Bridge Closure:

Scheduled for June 28, 2005*

Bridge to remain closed until Feb. 2006

(*may change due to weather)

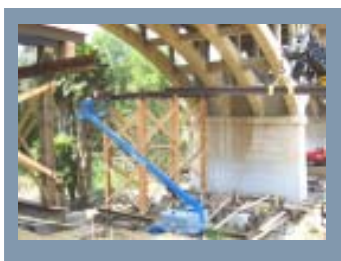

**Building framework for
arches and columns**

Victoria Avenue Bridge

- Spans the Tequesquite Arroyo, adjacent to the Victoria Country Club
- Originally constructed in 1891 as a wooden bridge, replaced in 1928 with current structure
- Most historic bridge in the City of Riverside
- Is being seismically retrofitted and brought up to current seismic standards
- **Retrofit includes:**
 - Reinforce the foundation of the Northerly pier
 - Reinforce the abutments at the ends of bridge
 - Strengthening the arches by wrapping with additional reinforcement
 - Stiffening the bridge laterally through construction of in-fill walls at strategic locations
 - Stiffening the bridge lengthwise through reconstruction of the bridge deck

Pedestrian Access

- A pedestrian bridge will be constructed on the easterly side of the bridge
- Pedestrian access will not be impacted at any time
- The pedestrian bridge will be constructed prior to the closure of Victoria Bridge

Project Activity

May:

- 9 - 13** Install falsework for arches
Install rebar for footings and pour footings
- 16-20** Install falsework for arches
Install rebar for temporary pedestrian bridge footings
- 23-27** Install falsework for columns
Pour footings for temporary pedestrian bridge
